WORK EXPERIENCE

Trainee
ELTEM | 2014

Trainee
ETSEP| 2015

Freelance Software Developer
2018 - 2020

Web applications, writing scripts for online game platforms. Logo, banner, and slider desing for websites.

Software Development Specialist
Aksiyon Teknoloji Hizmetleri
2021 - 2022

I started with the task of installing and commissioning our image processing sotfware and solving the problems with a remote connection.
I worked on RS485 Modbus RTU serial communication. I used Python Pyserial, Tkinter, and Pyqt5 library. I developed a desktop application to detect disconnected cameras and notify the user instantly. Also, developed a web application to receive technical requests, manage and store solutions. I use Python's Django library.

Front-end Developer
Weeb Group
2023

I developed website features using HTML, CSS, and JavaScript.
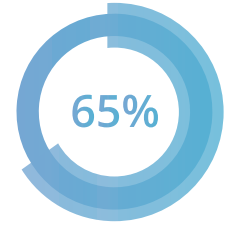

Front-end Developer
NGSI
2023

In my current role, I work with a Vue.js-based framework called Nuxt.js to create dynamic interfaces and perform server-side rendering.
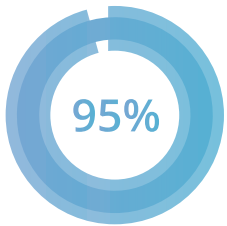

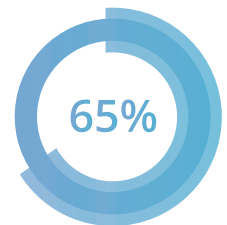

100% Python

65% C, C#, C++

80% Amazon Web Services

95% CSS, HTML and Javascript

65% React, React Native, Vue, Nuxt

85% Tailwind, Bootstrap

85% MsSQL, SQLite and PostreSQL

100% Windows Serves System Administration

TICKET SYSTEM

The purpose of this web application was to store users problems in a systematic way and we can track the solutions .

Also we can share quick-fix and product introductions with the users. I used django framework on development stage. Postgresql for database, publish with AWS.
